

DATASET DOCUMENTATION

HackStream – Sample Dataset Guide

1. Purpose

This dataset is provided to help participants understand the **data structure** and serve as a reference for building and testing applications.

Teams may:

- Use this dataset
 - Modify it
 - Replace it with their own data
-

2. Dataset Structure

sample_teams.csv

Column Name	Description
-------------	-------------

teamid	Unique team identifier
team_name	Team name
leader_name	Team leader
status	submitted / pending

sample_submissions.csv

Column Name	Description
-------------	-------------

teamid	Team ID
title	Project title
tech_stack	Technologies used
github_link	Source code URL

Column Name	Description
submitted_at	Timestamp

 sample_members.csv

Column Name	Description
teamid	Team ID
member_name	Member name

3. Usage Instructions

- CSV files can be imported into databases
 - Can be used for testing APIs
 - Can be visualized using tools like Excel or Pandas
-

4. Disclaimer

This dataset is for **demonstration purposes only**.

Participants are responsible for ensuring originality in their final submissions.

5. Recommended Tools

- Excel / Google Sheets
 - Pandas (Python)
 - MySQL / PostgreSQL
-

 Final Notes

Participants are free to extend the dataset based on their project needs.
