

PROBLEM STATEMENT

HackStream Hackathon – Problem Statement

1. Introduction

HackStream is a competitive hackathon platform designed to streamline team participation, project submission, evaluation, and real-time tracking. Participants are required to design, develop, and submit an innovative software solution that addresses a real-world problem using modern technologies.

The objective of this hackathon is to encourage creativity, teamwork, and problem-solving skills while building scalable and user-centric applications.

2. Problem Description

Participants must build a **functional software project** that solves a real-world problem in any domain such as:

- Education
- Healthcare
- Environment
- FinTech
- Smart Cities
- AI & Data Science
- Web or Mobile Applications

The solution should be practical, innovative, and technically sound.

3. Expected Deliverables

Each team must submit:

1. **Project Title**
2. **Problem Statement**
3. **Proposed Solution**
4. **Technology Stack**

5. **Source Code (GitHub Repository)**
 6. **Live Demo / Deployment Link (if available)**
 7. **Demo Video Link (optional but recommended)**
-

4. Constraints

- Only **one submission per team** is allowed.
 - Submission must be completed before the deadline.
 - Plagiarized projects will be disqualified.
 - Team size: **1 Leader + up to 3 members**.
-

5. Evaluation Criteria

Projects will be evaluated based on:

Criteria	Weightage
Innovation	25%
Technical Implementation	25%
Problem Relevance	20%
UI/UX Design	15%
Presentation & Documentation	15%

6. Submission Deadline

 **10 February 2026 – 11:59 PM IST**

Late submissions will not be accepted.

7. Final Note

Participants are encouraged to focus on **clarity, usability, and scalability**.

Best of luck and happy hacking! 🚀
